Critical periods of drought stress in corn

This is Ag Outlook on 1420 KJCK, I'm Chuck Otte, Geary County, K-State Research and Extension Ag & Natural Resources Agent. I still can't get used to talking about corn production in Geary County. Sure, I grew up in corn country, but when I first started there just wasn't much corn in Geary County. Now it's being grown in areas of the county that I never thought it would be tried! Unless the weather turns off as a repeat of 1993, which doesn't seem likely just yet, we are going to see periods of drought stress through the summer.

This has been Ag Outlook on the Talk of JC, 1420 KJCK, I'm Chuck Otte.
