Proper Use of the 4-H Clover Policy

The use of the K-State Research and Extension/Kansas 4-H co-wordmark is the basis of good marketing and a strong, consistent brand image, for both K-State Research and Extension and the Kansas 4-H program. This policy is being implemented by K-State Research and Extension and Kansas 4-H.

The co-wordmark is required on ALL 4-H print, digital, apparel and merchandise. **This requirement applies to all designs created by 4-H clubs and groups.** Examples include, but are not limited to:

<table>
<thead>
<tr>
<th>Print</th>
<th>Digital</th>
<th>Apparel</th>
<th>Merchandise</th>
</tr>
</thead>
<tbody>
<tr>
<td>Newsletters</td>
<td>Social Media ads</td>
<td>T-shirts</td>
<td>Pens/pencils</td>
</tr>
<tr>
<td>Event flyers</td>
<td>Cover photos</td>
<td>Bags</td>
<td>Stickers</td>
</tr>
<tr>
<td>Posters</td>
<td>Profile pictures</td>
<td>Jackets</td>
<td>Cups/Coasters</td>
</tr>
<tr>
<td>Event registrations</td>
<td>Web banners</td>
<td>Hats</td>
<td>Banners</td>
</tr>
</tbody>
</table>

The co-wordmark is available in both a vertical and horizontal format, as well as in color and black and white. These files can be found on the 4-H Promotional Resources page located at [http://www.kansas4-h.org/resources/marketing/](http://www.kansas4-h.org/resources/marketing/). Localized Geary County files are also available by contacting the Extension Office.

Vendors need to be K-State licensed, and that process may add additional length to your production timeline; allow two weeks to a month. The process of becoming a licensed vendor can be found at [https://www.kansas4-h.org/resources/marketing/index.html](https://www.kansas4-h.org/resources/marketing/index.html). Please share this information with your vendor(s).

We understand that designs may feature a 4-H clover as part of the creative design. This is permissible, as long as the K-State Research and Extension/4-H co-wordmark is included somewhere on the item as well. Please do not use true blue or red apparel, as those colors create brand confusion and do not comply with the K-State Style Guide. Be aware that there are many “illegal” clipart clovers floating around the internet- to ensure you are using a correct one, we ask that you use the ones provided at [http://www.kansas4-h.org/resources/marketing/](http://www.kansas4-h.org/resources/marketing/).

To successfully market our services and programs, we must be consistent with the use of our co-wordmark on all items that we design and create. If you are unsure of your design or use of the co-wordmark, please contact the Extension Office.

Thank you for your assistance in promoting a strong brand image for K-State Research and Extension and Kansas 4-H.

Using the 4-H Name & Emblem: Graphics Basics

The Official 4-H Emblem
The Official 4-H Emblem is a 4-leaf clover with an H in each leaf, with the stem turned to the right. The Emblem may be two-dimensional (flat) or three dimensional (with shadows that show depth and perspective). Authorized users of the 4-H Emblem should take care to ensure that when they use the Emblem, they have done the following:
1. They have obtained the Official 4-H Emblem and are using it in its entirety.
2. They do not “flip” the image to create a framed look. The stem on the 4-H Emblem must point to the right as you look at the image. Under no circumstances should the stem be changed to point to the left.
3. They are familiar with resizing graphics through the software application being used, and do not distort or warp the dimensions of the Emblem.
4. The 4-H Emblem is never used to imply endorsement of any product or material.
5. They follow the graphic use guidelines outlined in this document, or for additional information, contact 4-H National Headquarters.

Use the Whole Emblem
The 4-H Emblem should always appear in its entirety - meaning it should always appear as a whole and complete image - the image recognized by millions of people. This means:
- don’t remove any leaves. If you are using a clover image that has an “H” on each leaf, the leaves cannot be removed or have another image superimposed over the top of one of the leaves. Other images should be moved and appear completely separate from the 4-H Emblem. This also means you shouldn’t “cut off” a leaf by running it off the edge of the paper in print media or other designs.
- Don’t place text or other images over or on top of the 4-H Emblem. The 4-H Emblem should not appear screened under words or graphics. No photo, drawing, symbol, word or other figure or object may be placed on or obscure the 4-H Emblem. This includes on web pages, where it should not appear as a “watermark” behind other information.

Keep it Upright
In general, the 4-H Emblem should not be rotated or turned on its side. There are some exceptions, such as on fabric where the emblem is scattered randomly across the fabric or in other random designs. If you are considering an exception, please contact the 4-H National Headquarters.

Color
The 4-H Emblem should never be screened, shaded, gradated, or appear in a multi-colored hue. The official and preferred color of the 4-H Emblem is 100 percent PMS 347 green, (The H’s reversed out to the color of the paper on which the emblem is printed). The clover can also be white, black, or metallic gold. The H’s on the clover can be white, metallic gold (only on a green clover), green (only on a white clover), or black. The clover can be outlined in green (for white clover) or white (for green clover) to add prominence to the image and make the emblem stand out from the background.

One-color printing requires either PMS 347 green or black. For commercial applications, the “18 USC 707” notice should be the same color as the clover leaves. Black is the only acceptable alternative to green for one-color printing and should be used only when cost prohibits green ink or color photocopies.

Two-color printing—Only PMS 347 green may be used for the leaves and “18 USC 707” notice—the H’s will be reversed out of the PMS 347 to be white or the color of the paper on which the emblem is printed. The H’s may also be printed in metallic gold (PMS 873) on a green background.

Four-color process (full color printing)—In four-color process printing, PMS colors are approximated using a particular combination of the standard four-color process printing inks. The four-color process percentages required to match 4-H’s PMS 347 green are: cyan 100%, magenta 0%, yellow 90%, and black 0%. There is no CMYK equivalent to PMS 873.
